# Global table of contents

AUTHORS'S INDEX   COUNTRY	TOPIC	ARTICLE TITLE	VOLUME	PAGE
ABASS Hussain   UNITED KINGDOM	Long discontinuous fibre composites	A Numerical Study into the Effect Of Defects and Meso-Scale Variability on Properties of Discontinuous Long Fibre Thermoplastic Composites	Vol.8	718
ABDO Meiran   UNITED KINGDOM	Poster	Studying surface roughness techniques to enhance the bond performance of recycled FRP needles in concrete.	Vol.7	99
ABHYANKAR Kaushik   GERMANY	Applications	Advancing sustainable marine propulsion: composite fuel storage tanks for next-generation ammonia-powered ships	Vol. 1	129
ABRANTES Sílvio   PORTUGAL	Additive manufacturing	A sustainable approach to tanned leather wastes using AM technologies	Vol. 5	422
ABREU FILHO Marco A.   PORTUGAL	Durability, ageing, environmental effects	Experimental and numerical analyses on the thermal distribution within hybrid FRP sandwich panels under different climatic conditions	Vol. 3	976
ACAUAN Luiz   UNITED STATES OF AMERICA	Structural integration of devices	Tailoring multifunctional properties of epoxy-based structural polymer electrolytes by dual curing process.	Vol.6	247
ACOSTA CORREA Jose David   UNITED KINGDOM	Poster	Promises and challenges of using electrical resistance change to detect damage in carbon fibre composite laminates	Vol. 3	435
AGARWAL Sovit   GERMANY	Poster	Width deformation of thermoplastic prepreg tapes during Automated Fiber Placement	Vol. 5	146
AHMADVASHAGHBASH Sina   BELGIUM	Bio-inspired designs	Intermittent Interfaces in Fiber-Reinforced Composites: Optimising the Balance Between Strong and Weak Fibre-Matrix Interfaces	Vol. 3	1085
AHMED WAGIH Ahmed   SAUDI ARABIA	Delamination prediction and mitigation in laminated structures	3D printed auxetic stiffener as a new concept for lightweight high strength and toughness metal-CFRP T-joint	Vol.8	450
AKLEH Wajih   FRANCE	Poster	Accurate Assessment of the Tensile Strength of High-Performance Carbon Fibre Unidirectional Composites for Hydrogen Storage Applications	Vol. 4	142
AL-MAQDASI Zainab   SWEDEN	Bio-composites	Characterization and Performance Evaluation of Lignin-Modified Epoxy Resin for potential use in Natural Fiber Reinforced Composites	Vol. 2	784
AL-RAMAHI Nawres   SWEDEN	Poster	Analysis of electrical performance of carbon fiber composites for heat generation in deicing applications	Vol. 3	1091
ALABDOULI Khawlah   UNITED ARAB EMIRATES	Additive manufacturing	Experimental Characterization of Multi-Material Interfaces in Additive Manufacturing	Vol. 5	414
ALAPATI Arun Kumar   UNITED KINGDOM	Poster	Influence of Nanosilica Particles on Mechanical Properties and Recycling Efficiency of Epoxy Modified Composites	Vol.7	40
ALAWAR Rami   FRANCE	Poster	Interface formation mechanisms in fibre reinforced thermoplastic tapes	Vol. 5	407

AUTHORS'S INDEX   COUNTRY	TOPIC	ARTICLE TITLE	VOLUME	PAGE
ALI Nazim   BELGIUM	Composites for Hydrogen Storage I	Mechanical performance assessment of Composite Type IV Hydrogen Tanks with high-fidelity finite element models	Vol.8	726
ALIOTTA Laura   ITALY	Bio-composites	Investigation of novel poly(lactic acid) (PLA)/ Hazelnut Shell Powder biocomposites for 3D printing applications	Vol. 2	454
ALLIYANKAL VIJAYAKUMAR Amal   ITALY	Poster	Innovative welding-based approach for skin/core bonding in thermoplastic foam-based sandwich structures	Vol. 5	738
ALMOUSA Hassan   UNITED KINGDOM	Understanding and improving longitudinal compressive strength	How Can Hierarchical Composites with Carbon Nanotube-Grafted Carbon Fibres Enhance Compression Performance?	Vol.8	734
AMFILOCHIOU Virginia   BELGIUM	Vitrimer matrix composites	Residual Mechanical Properties of Glass Fibre-Reinforced Vitrimer after Reprocessing	Vol.8	37
AMIRALI Amirali   NEW-ZEALAND	Additive manufacturing	Characteristics of additive manufacturing defects in polymeric lattice structures	Vol. 5	154
ANAGNOSTOPOULOU Aikaterini   GREECE	Reuse, Remanufacturing and Recycling	Sustainability Assessment of Composite Aircraft Liquid Hydrogen Tanks Using Multi-Criteria Decision-Making Methods	Vol.8	680
ANAGNOU Stavros   GREECE	Reuse, Remanufacturing and Recycling	Design and manufacture of sustainable processes for recovery and production of Carbon Fibres	Vol.8	456
ANDRISS Christian   GERMANY	Novel test methods	An integral method for the efficient characterization and modelling of the nonlinear, rate dependent mechanical behavior of continuous fiber-reinforced thermoplastics	Vol. 4	1
ANDRZEJEWSKI Jacek   POLAND	Applications	Bioresorbable composites in regenerative medicine. The use of 3d modeling techniques in the production of personalized implants	Vol. 1	40
ANISKEVICH Andrey   LATVIA	Additive manufacturing	Mechanical and thermophysical properties of some polymers used for 3D-Printed hybrid structures	Vol. 5	91
ANIŚKO Joanna   POLAND	Poster	The use of black tea waste as a thermo-oxidation stabilizer for polyethylene composites in rotational molding technology	Vol. 2	35
ANTHONY David B   UNITED KINGDOM	Understanding and improving longitudinal compressive strength	30 years of development of the "Imperial College London Compression Standard"	Vol.8	741
ANTONIOU Alexandros   GREECE	Buckling & stability	A novel test load frame for characterizing the buckling resistance of thick sandwich panels	Vol. 3	808
ANTONY Liya   ITALY	Energy storage and harvesting	Towards innovative bio-based transparent wood composite with high transmittance	Vol.6	232
ANTUNES Paulo   PORTUGAL	Adaptive response and reconfiguration	Understanding fatigue life and Winding Optimization of Composite Overwrapped Pressure Vessels using embedded FBG sensors	Vol.8	45
AOKI Ryoma   JAPAN	Fatigue	Numerical prediction of fatigue damage progress and residual strength after fatigue in composite pressure vessel	Vol. 3	1099
ARABUL Ege   UNITED KINGDOM	Poster	A novel method for forming realistic pre-preg wrinkles in an AFP representative setup and their characterisation	Vol.8	227

AUTHORS'S INDEX   COUNTRY	TOPIC	ARTICLE TITLE	VOLUME	PAGE
ARAVAND Ali   UNITED KINGDOM	Process modeling and simulation	Crystallinity-Based Rheological Modelling for Interface Prediction in PEEK Overmoulded Composites	Vol. 5	429
ARRESE Ainhoa   SPAIN	Poster	Characterization of fatigue-driven delamination in mode	Vol. 3	1113
ASADI Amir   UNITED STATES OF AMERICA	Hybrid composites	Enhancing Electrochemical and Mechanical Properties of Solid Structural Battery Composites through the Modification of Polymer Electrolyte Chemistry and Patterning of Electrode-Electrolyte Interface	Vol.6	178
ASANO Kazunori   JAPAN	Poster	Fabrication and Damping Capacity of Short Alumina Fiber and VGCF Hybrid Reinforced Aluminum Alloy Composites	Vol. 2	203
ASSENHEIMER Sabrina   SWEDEN	Bio-composites	Improved curing and reduced moisture sensitivity of structural composites based on active cellulose nanofibril fibres and epoxy resin	Vol. 2	396
ATHIRA ANIL KUMAR Athira Anil   UNITED KINGDOM	Textile composites	Implementation of Second-Order Homogenisation using Shell Elements for Woven Composites	Vol. 3	1120
AZADI Shain   ITALY	AI-based methods	Delamination classification in composite plates using guided waves and 1D-CNN	Vol. 3	101
BA El Hadji Amadou   FRANCE	Sandwich structures	Influences of mechanical and water aging on changes in mechanical behavior and damage mechanisms on sandwich structures used as windturbine blades in marine environment (EMR)	Vol. 3	840
BABA Haruya   JAPAN	Nanocomposites	Study on dispersion mixing of cellulose nanofiber reinforced polyvinyl chloride composite materials using a single screw extruder	Vol. 2	239
BABEAU Arthur   FRANCE	Hybrid-Molding Technologies for Thermoplastic Composites	UDX® PA11 tape and an innovative continuous preforming system for large-volume applications	Vol.8	463
BACKENS Simon   GERMANY	Reuse, Remanufacturing and Recycling	Recycling of CFRP based on anhydride-crosslinked EP with subcritical water	Vol.7	9
BADE Raja   GERMANY	Bio-composites	Toward adhesives-free bio-based composites via uv-assisted interfacial cross-linking	Vol. 2	492
BAEK Jeong-Hyeon   SOUTH KOREA	Multiscale modeling	Prediction of Mechanical Behavior of Carbon Fiber Braided Composites: A Multi-Scale Simulation-Based Progressive Failure Model	Vol. 3	191
BAI Renzi   CHINA	Manufacturing defects in composite materials and structures	Physics-based drapability ratio used to evaluate wrinkle-free textile reinforcement preforming ability	Vol.8	1
BALAJI Aravind   BELGIUM	Manufacturing defects in composite materials and structures	Influence of manufacturing residual stress on inter- and intra-laminar damage propagation in thermoset parts	Vol.8	749
BALTHAZAR Matthis   FRANCE	Forming & stamping	Improvement of thermal management of tooling using lattice structures. Application to omega stringer mould	Vol. 5	99
BANGARU Ashish Kumar   DENMARK	Fatigue	Understanding fatigue delamination crack growth in a wind turbine rotor blade through an element testing	Vol. 3	1132
BARAL Paul   FRANCE	Permeability of fibrous reinforcements for resin flow	Permeability of 3D printed porous media: towards the convergence of experimental and numerical results	Vol.8	757

AUTHORS'S INDEX   COUNTRY	TOPIC	ARTICLE TITLE	VOLUME	PAGE
BARANDUN Gion Andrea   SWISS	Hybrid-Molding Technologies for Thermoplastic Composites	Enhancing sustainability of thermoplastic composite parts through backmolding of UD-Tapes with recycled PET materials	Vol.8	124
BARBINI Alessandro   SWISS	Continuous-discontinuous fiber-reinforced polymers (CoDiCoFRP)	Automated process and optimal design for unidirectional reinforced discontinuous long fiber composites	Vol.8	765
BARCZEWSKI Mateusz   POLAND	Bio-composites	Process aspects of forming polyethylene-based composites filled with functional waste-plant fillers by rotational molding technology	Vol. 2	133
BAROCIO E.   SWISS	Continuous-discontinuous fiber-reinforced polymers (CoDiCoFRP)	Compression molding of hybrid continuous and discontinuous fiber reinforced thermoplastics for enhancing strength characteristics while proving material circularity.	Vol.8	1379
BARZEGAR Ali   TURKIYE	Poster	Enhanced Predictive Modeling of Intimate Contact in Laser-Assisted Fiber Placement Using the Modified Mantell and Springer Approach	Vol. 5	745
BASCUCCI Christopher   SWISS	Poster	3D printable piezoresistive tactile sensing technologies for soft robotics	Vol.6	277
BAUDOIN Pierre   FRANCE	Full-field methods	Validation of constitutive composite models through experimental vs. simulation full-field data comparison	Vol. 4	161
BAUMANN Jonas-Rumi   GERMANY	Poster	Resources from sustainable land use for natural fibre composite injection moulding	Vol. 2	498
BAVASSO Irene   ITALY	Bio-composites	Trade-off between performance and processability of PLA/PBAT/PHBV-Flax composites: effect of flax fibers surface modification	Vol. 2	42
BEHRENS Alexander   GERMANY	Poster	Towards improving the fibre-matrix adhesion in oleaginous flax fibre polylactide (PLA) composites	Vol. 2	503
BENDER Marcel   AUSTRIA	Textile composites	Influence of Fluid Properties on Transverse Fabric Compressibility During In-Situ Impregnation	Vol. 3	1140
BERRO Mohammad Jawad   FRANCE	Reuse, Remanufacturing and Recycling	Recycling by Reforming of Composites Made with a Polyester Matrix	Vol.7	107
BERTRAND Pierre   FRANCE	Full-field methods	Identification of fracture behaviour at the interface between CMC and EBC at room and high temperature via full field measurements method	Vol. 4	54
BEZERRA Renato   GERMANY	Automated placement technologies	Production of a complex shape thermoplastic CFRP structure by T-AFP with in-situ consolidation	Vol. 5	437
BIRKE Michael   GERMANY	Composites for Hydrogen Storage I	Investigation of Variable Axial Reinforcements of Lateral Pressure Vessel Openings using Element Level Pipe Specimens	Vol.8	773
BLACHA Martin   GERMANY	Bonding and bonding repairs	A basic principle for damage-tolerant structural bonding in aerospace applications	Vol.8	131
BLAL Abdelhadi   CANADA	Fibers & textiles	Increasing the tensile properties of a unidirectional/mat dry reinforcement for composite applications via the addition of nanocellulose combined with click chemistry modifications.	Vol. 2	141

AUTHORS'S INDEX   COUNTRY	TOPIC	ARTICLE TITLE	VOLUME	PAGE
BLASS Ulrich   GERMANY	Composites for Hydrogen Storage I	Cylindrical hydrogen pressure vessel	Vol.8	778
BÖHM Robert   GERMANY	Energy storage and harvesting	Pore Network Modeling of Ion Transport Properties in Bicontinuous Electrolytes for Multifunctional Energy Storage Composites	Vol.6	122
BOLD Jens   GERMANY	Keynote Lecture	Analytical and Numerical Modeling of Aramid Honeycomb Cores	Vol. 3	826
BOND Emily   UNITED KINGDOM	Lightning Strike, fire behavior and fire retardance/resistance of composites	Finite Element Modelling of Lithium-Ion Battery Fires on Composite Structures	Vol. 3	1
BONE Jasmine   UNITED KINGDOM	Durability, ageing, environmental effects	Micromechanical Property Characterisation of Water Absorption in Carbon Fiber Epoxy Composites using Nanoindentation	Vol. 3	1148
BORIUS Zoé   FRANCE	Matrix materials: polymers, metals, ceramics, concrete, geopolymer	Microstructural analysis and mechanical behaviour of oxide/oxide CMCs prepared by continuous tow impregnation	Vol. 2	510
BOSE Sudip   FRANCE	Poster	Leveraging Computed Tomography & information technology to enable wider adoption of CFRP Composites through efficient production and safe application	Vol.8	785
BOTTA Luigi   ITALY	Poster	Polymeric biocomposites from cactus pear by-products: utilizing glochids and peel for sustainable materials	Vol. 2	247
BOUBAKER Mouadh   FRANCE	Poster	Numerical permeability prediction of a fibrous reinforcement based on real images and comparison with experimental values.	Vol.8	792
BOUGHERARA Habiba   CANADA	Additive manufacturing	Mechanical Characterization of 3D-Printed UV-curable Thermoset Reinforced with Continuous Fibers	Vol. 5	730
BOURDON Killian   LUXEMBOURG	Poster	Enhancing vitrimer composite repairability via hybrid carbon/flax reinforcement	Vol.8	798
BREARLEY David   UNITED KINGDOM	Poster	Failure of Bonded Composite Joints at Cryogenic Temperatures Loaded in a Modified Arcan Fixture	Vol. 4	113
BREITE Christian   BELGIUM	Computed tomography	Mapping of local fibre strain in carbon fibre-reinforced polymers using X-ray diffraction	Vol.8	806
BRUGO Tommaso Maria   ITALY	Sensing and actuation	Self-sensing composite laminate based on piezoceramic nanofibers for impact localization	Vol.6	188
BRUNEAU Awen   FRANCE	Continuous-discontinuous fiber-reinforced polymers (CoDiCoFRP)	Numerical simulation and experimental validation of a composite recycling process : from packing to consolidation.	Vol.8	233
BRUYNEEL Michael   BELGIUM	Fracture and damage	Modelling coupons at dome area of composite pressure vessels: from a 2D-shell to a 3D-solid formulation, with comparison to test results	Vol. 3	109
BRYCE David   UNITED KINGDOM	Reuse, Remanufacturing and Recycling	Development of bulk moulding compounds and extrusion compounding processes using recycled glass fibres	Vol.8	240
BUGAUT Mathieu   FRANCE	Nanocomposites	Cellulose nanocrystals as reinforcements in thermoplastic composites: processing routes as key	Vol. 2	518

AUTHORS'S INDEX   COUNTRY	TOPIC	ARTICLE TITLE	VOLUME	PAGE
BULDERBERGA Olga   FRANCE	Poster	Printing parameters and mechanical characteristics of thermoplastic polymers for 3D printed hybrid structures	Vol.8	247
BURKE Gabriel   UNITED KINGDOM	Data-driven approaches for composite characterization, monitoring, development	Artificial Intelligence for Process Monitoring of Automated Fibre Placement - Real-time Defect Detection and Classification	Vol. 5	445
BUTLER Richard   UNITED KINGDOM	Joining & joints	An efficient method to predict skin-stiffener debonding in post-buckled panels	Vol. 3	207
CABA Stefan   GERMANY	Reuse, Remanufacturing and Recycling	Design of Reusable Components for Composites Circular Economy	Vol.8	471
CAFARO Fabrizio   ITALY	Poster	Reduction of environmental impact of epoxy resins used in composite materials	Vol. 2	524
CALABRESE Luigi   ITALY	Energy storage and harvesting	Mechanical and adsorption characterization of a calcium lactate/S-PEEK composite coating for thermochemical energy storage	Vol. 2	253
CAMPO GOMEZ Monica   SPAIN	Poster	Study of the recyclability of carbon fibers of composite materials for use as textile coatings	Vol.7	48
CANEGRATI Andrea   FRANCE	Poster	Investigation of Short Fiber Reinforced Polymers fatigue behaviour using specimens of highly coherent fibres orientation	Vol.8	812
CANTURRI Carla   SINGAPORE	Hybrid-Molding Technologies for Thermoplastic Composites	Damage mechanisms from galvanic corrosion in thermoplastic composites	Vol. 1	25
CANTWELL Wesley   UNITED ARAB EMIRATES	Maintainance & repair	The Repair of Interlaminar Fracture in Thermoplastic-matrix Composites	Vol. 3	32
CAPRETTI Monica   ITALY	Hybrid composites	On Design and Optimization of Flax and Hybrid Composite Tubular Structures Subject to Axial Crushing	Vol. 3	847
CARDONA Carlos   LUXEMBOURG	Fracture and damage	Mechanical behaviour of bamboo fibres at the micro scale by applying digital image processing analysis	Vol. 3	1156
CARDOSO Diogo   PORTUGAL	Liquid composite molding	Exploring a Hybrid Computer Vision Approach for Resin Flow Front Tracking in Composite Manufacturing	Vol. 5	452
CARLONE Pierpaolo   ITALY	Liquid composite molding	Online microwave preheating for resin flow enhancement in liquid composite molding processes	Vol. 5	460
CARMINE Contaldi   DENMARK	Fracture and damage	A semi-analytical model for crack kinking out of the interface of bimaterial anisotropic layers	Vol. 3	1172
CARREIRAS Ana Rita   PORTUGAL	Adaptive response and reconfiguration	Study and characterisation of Mode interlaminar fracture in thermoplastic composites and healing	Vol.8	139
CARVALHO TEIXEIRA Maria Helena   PORTUGAL	Bio-composites	Bio-based sandwich panels for sustainable building construction and rehabilitation	Vol. 2	540
CARVELLI Valter   ITALY	Applications	Hybrid steel fiber reinforced concretes: effects of elevated temperature and water re-curing on the mechanical performance	Vol. 1	1
CASARI Pascal   FRANCE	Poster	Modeling and experimental analysis of moisture diffusion behavior in bio-based balsa wood core composite sandwich	Vol.7	115
CASTANIÉ Bruno   FRANCE	Poster	Numerical and Experimental analysis of the effect of Wrinkles on the residual strength of curved laminates	Vol.8	7

AUTHORS'S INDEX   COUNTRY	TOPIC	ARTICLE TITLE	VOLUME	PAGE
ÇELİK Murat   UNITED KINGDOM	Poster	Tailored Hybrid Composite Preforms by Automated Fibre Placement of Powder Epoxy-Based Towpregs	Vol. 2	459
CHAKRABORTY Souvik   GERMANY	Poster	Filaments for additive manufacturing reinforced with carbon fibers from waste stream	Vol.7	16
CHALOUPKA Niklas   GERMANY	Poster	Characterization of ultrasonic welding bonds in hybrid composites – realisation and feasibility of a novel joining process in aerospace application	Vol. 1	101
CHANDRAKAR Prateek   INDIA	Buckling & stability	Stochastic thermal buckling investigation of optimized variable stiffness composite laminates incurred internal flaws	Vol. 3	199
CHAO Luo   JAPAN	Multiscale modeling	Multiscale study on nonlinear properties of cellulose nanofiber-reinforced thermoplastic polymer composite filaments	Vol. 3	214
CHARKIEH Ahmad Shawki   BELGIUM	Short & long fibre composites	Mechanical performance of 3D printed fibre-reinforced triply periodic minimal surfaces structures	Vol. 3	39
CHATZIATHANASIOU Thanasis   BELGIUM	Computed tomography	Synchrotron radiation holotomography for in-situ 3D monitoring of longitudinal debonding around fibre breaks	Vol.8	50
CHAUDHARY Amit   INDIA	Fracture and damage	A new semi-discrete continuum damage modelling framework for composites with focus on open-hole compression failure	Vol. 3	443
CHEBBO Hussein   FRANCE	Durability, ageing, environmental effects	Accelerated ageing of a pultruded FRP composite PA6/GF: Characterisation and modelling of hygrothermal ageing	Vol. 3	1164
CHEN Yang   UNITED KINGDOM	Liquid composite molding	Physics-informed neural networks for resin flow prediction in fibre textiles	Vol.8	292
CHENG Emily   UNITED KINGDOM	Multifunctional Composites for Energy Applications	Hybrid Structural Power Composites: Exploring Opportunities and Challenges	Vol.8	875
CHEVALLIER Anouk   FRANCE	Micro- and nano-scale test methods	Single fibre tensile testing: analysing the influence of fibre misalignment to reduce uncertainties in properties identification	Vol. 4	170
CHIANG Chin-Lung   TAIWAN	Poster	Preparation of a bio-inspired halogen-free flame retardant containing sugarcane bagasse, phosphorus and nitrogen through a hydrothermal method and its application in epoxy resin	Vol. 2	1
CHIANG Yu-Chun   TAIWAN	Poster	Carbon nanofiber composites doped with different ZIF-8 nanoparticles for carbon dioxide capture	Vol. 2	22
CHIAPPINI Attilio   FRANCE	Manufacturing defects in composite materials and structures	A Numerical Approach for Modelling the Effects of AFP Singularities	Vol.8	828
CHIMONIDES Elia   UNITED KINGDOM	Poster	Thermoplastic Structural Electrolytes	Vol.8	252
CHRYSAFI Iouliana   LUXEMBOURG	Short Fibre Reinforced Polymers	Enhancing Bamboo Fiber-Polypropylene Composites: A Novel Approach for Improved Interface and Mechanical Properties by selective deposition of Maleic anhydride grafted polypropylene	Vol.8	688

AUTHORS'S INDEX   COUNTRY	TOPIC	ARTICLE TITLE	VOLUME	PAGE
CILENTO FABRIZIA   ITALY	Material by design	Investigation on GNP layer as protection against high thermal fluxes in CFRP composites	Vol. 3	1204
CONDÉ-WOLTER Jan   GERMANY	Composites for Hydrogen Storage I	Experimental analysis of damage-dependent gas leakage in fibre reinforced composites	Vol.8	1002
CORREA Elena   SPAIN	Interfaces	Experimental and numerical comparison of fibre/matrix debond extension in ultra-thin plies after tension-tension cyclic loading	Vol. 3	1178
CORREIA João   PORTUGAL	Adaptive response and reconfiguration	New embeddable layer concept for real-time monitoring of composite structures	Vol.8	300
CORVO ALGUACIL Marina   SWEDEN	Fibers & textiles	Scaling up a Two-Step Pyrolysis of CFRP: Study of Validation and Robustness	Vol. 2	260
CRACKNELL Dayna   NEW-ZEALAND	Applications	Tailored solid-liquid composite for enhanced comfort in orthotic insoles	Vol. 1	64
CUENOT Célia   FRANCE	Experimental methods for process characterisation	Experimental study of thermoplastic carbon composite consolidation by Vacuum Bag Only (VBO)	Vol. 5	107
CZÉL Gergely   HUNGARY	Integrated testing and modelling of composite structures	Direct comparison of novel unidirectional sandwich coupon designs for accurate tensile failure strain determination of carbon fibre epoxy material	Vol. 4	25
DADABO Koami Pierre   FRANCE	Multiscale modeling	Eshelby's inhomogeneity problem in complete Mindlin's first strain gradient elasticity theory	Vol. 3	775
DAELEMANS Lode   BELGIUM	Micro- and nano-scale test methods	Fiber-matrix debonding behaviour using in-situ electron and light microscopy during mechanical testing	Vol. 4	175
DAGHIA Federica   FRANCE	Keynote Lecture	Mechanism-based modelling of the viscoelastic response of a unidirectional composite ply: validation of a new transversely isotropic model through analytical and numerical homogenisation	Vol. 3	113
DAHLE Monali   UNITED KINGDOM	Textile composites	Influence of textile architecture on the drape, impact, and damage tolerance performance of 3D woven glass fibre composites	Vol. 5	48
DAI Ziqi   NEW-ZEALAND	Aerospace - aeronautics	Development of composite carbon fibre coaxial contra-rotating uav propeller blades with skewed geometry	Vol. 1	8
DARRAS Nicolas   UNITED KINGDOM	Understanding and improving longitudinal compressive strength	Finite element investigation of "cradle tests" for the mechanical characterization of pultruded rods under compression	Vol.8	836
DASTANI Kia   HONG-KONG	Additive manufacturing	Engineered 3D nano-assembly of ceramics	Vol.8	58
DAUSSEINS Julie   FRANCE	Hybrid-Molding Technologies for Thermoplastic Composites	DAHER : leader of thermoplastic composites in aeronautics	Vol.8	66
DAVIDSON James R   UNITED KINGDOM	Poster	Pneumatic Splicing for Sustainable Composite Manufacture: Influence of Spliced Tow Connections on the Mechanical Performance of Composite Structures.	Vol. 5	262
DAVIES Jack M   UNITED KINGDOM	Liquid composite molding	A numerical tool for smart in-situ sensing of defect features in large scale infusions	Vol.8	844
DAVIN Tanguy   FRANCE	Poster	Contactless temperature monitoring and boundary conditions determination of the back surface of a woven-ply laminate under fire exposure	Vol. 4	182

AUTHORS'S INDEX   COUNTRY	TOPIC	ARTICLE TITLE	VOLUME	PAGE
DE ANTUNES E SOUSA Guilherme   PORTUGAL	Poster	Cork-based Composite Materials Suitable to Protect Type I Hydrogen Tanks	Vol. 3	783
DE ARAUJO ALVES LIMA Rosemere   NETHERLANDS	Delamination prediction and mitigation in laminated structures	Disrupting fracture toughness of adhesively bonded joints by tailoring composite substrates	Vol.8	1010
DE BONI Matteo   ITALY	Fatigue	Analysis of the cycle-mix effect on transverse cracking in glass/epoxy laminates under spectrum loadings	Vol.8	1017
DEBABRATA ADHIKARI Debabrata   DENMARK	Permeability of fibrous reinforcements for resin flow	An efficient approach for mesoscale virtual permeability predictions using realistic fiber geometry extracted via micro-X-ray computed tomography.	Vol. 5	467
DEBARRE Antoine   FRANCE	Fracture and damage	Experimental and numerical study of the mechanical behaviour of an oxide/oxide ceramic-matrix-composite at high temperature	Vol. 3	358
DECKER Julia   GERMANY	Short Fibre Reinforced Polymers	Estimating the service life of short-fiber-reinforced thermoplastics using algorithms	Vol.8	852
DEI SOMMI Andrea   ITALY	Poster	Optimizing Autoclave Curing: A Finite Element Approach to Reduce Porosity in Composite Laminates	Vol. 5	17
DEMIR Serdar   TURKIYE	Poster	THE INFLUENCE OF THE CRUSH PLUGS ON THE ENERGY ABSORPTION OF CARBON/EPOXY COMPOSITE CIRCULAR TUBES UNDER AXIAL CRUSHING	Vol. 3	675
DEMOULIN Leyne   FRANCE	Fracture and damage	Identification of local to global mechanical properties of clear wood peeled veneers from off-axis tensile tests using full-field local displacement measurements	Vol. 3	451
DENIS Yvan   FRANCE	Process modeling and simulation	Investigation on factors causing tool distortion in the manufacturing of high-performance thermoplastic composite materials	Vol. 5	56
DEYDIER Maxime   FRANCE	Fracture and damage	Design assessment of composite patch repair on steel structures based on toughness tests using a newly designed non-standard "equivalent interface" specimen	Vol. 3	984
DIAEDDINE Mohamed   FRANCE	Liquid composite molding	Experimental visualisation and numerical modelling of macropore flows in fibrous preforms for Liquid Composite Molding	Vol.8	254
DIANI Marco   ITALY	Reuse, Remanufacturing and Recycling	Exploring recycling of composites using High-Voltage Fragmentation	Vol.8	860
DIETRICH Sarah   GERMANY	Foams, cellular and lattice materials	Investigation of the thermoviscoelastic behaviour of a closed-cell polymer structural foam under pressure for processing in hybrid LCM processes	Vol. 2	548
DILBER Ahker Gunes   TURKIYE	Applications	Evaluation of the strain measurement techniques for the mechanical characterization of cfrp composites	Vol. 1	32
DIMASSI Adli   GERMANY	Sandwich structures	Investigating load introduction methods for aircraft floor panels made of foam core sandwich	Vol. 3	458
DISSANAYAKE Nilmini   UNITED KINGDOM	Reuse, Remanufacturing and Recycling	Enhancing data quality in Life Cycle Assessment (LCA) for composite materials during primary data acquisition	Vol.7	32
DOITRAND Aurélien   FRANCE	Fracture and damage	Simulation of transverse cracking and subsequent acoustic emission in laminates	Vol. 3	118

AUTHORS'S INDEX   COUNTRY	TOPIC	ARTICLE TITLE	VOLUME	PAGE
DOLBACHIAN Loan   FRANCE	Poster	Structural Health Monitoring (SHM) of Polymer-Matrix Composites (PMC) with the insertion of piezoelectric transducers and Data Fusion approach	Vol.6	285
DORIAT Aurélien   FRANCE	Durability, ageing, environmental effects	Thermo-Oxidation Aging of Carbon-Fiber Reinforced Epoxy Polymer Composite under High-Speed Air Flow	Vol. 3	992
DORIGATO Andrea   ITALY	Self-healing	Development of thermoplastic polymer blends for structural composites with self-healing capability	Vol.6	90
DRANSFELD Clemens   NETHERLANDS	Matrix materials: polymers, metals, ceramics, concrete, geopolymer	Controlling Dual scale Morphologies of Epoxy and Poly(ether imide) towards improved Interlayer toughening of composites.	Vol. 2	555
DRAPIER Sylvain   FRANCE	Permeability of fibrous reinforcements for resin flow	A stochastic upscaling approach of impregnation flows in fibrous microstructures for composite process modelling	Vol.8	308
DROSTE David   GERMANY	Permeability of fibrous reinforcements for resin flow	Concept for a permeability model for non-crimp fabrics	Vol.8	481
DROUHET Quentin   FRANCE	Computed tomography	The yarn/matrix interface in composite materials: fragmentation tests and micro-CT based digital volume correlation	Vol.8	262
DROUIN Thomas   FRANCE	Fracture and damage	Thermo-mechanical study of oxide/oxide CMCs using in-situ micro-ct tests and digital volume correlation	Vol. 3	1182
DRUMMER Jonas   GERMANY	Manufacturing defects in composite materials and structures	Static and fatigue properties of glass fibre reinforced polymers with defined fibre misalignments under tensile load	Vol.8	488
DUBARY Nicolas   DENMARK	Fracture and damage	On the use of modeling to assist experimental issues and method development for compressive characterization determination of pultruded carbon fiber specimen	Vol. 3	464
DUHOVIC Miro   GERMANY	Long discontinuous fibre composites	3D-digitization of the fiber orientation in C-SMC semi-finished products using in-situ polarization imaging	Vol.8	316
DUL Sithiprumnea   SWISS	Additive manufacturing	Bicomponent melt-spinning of filaments for material extrusion 3D printing	Vol. 5	475
DURAND Tristan   FRANCE	Tests in severe conditions	Gas permeability of thermoplastics at low temperature: effect of glass transition and crystallinity	Vol. 4	9
DUSHIMIMANA Aloys   PORTUGAL	Durability, ageing, environmental effects	Modelling of short- and long-term bond behavior in concrete structures strengthened with externally bonded CFRP composites	Vol. 3	683
DUTTA Abhik   SWEDEN	Forming & stamping	On the influence of pre-consolidation on interply friction	Vol. 5	481
DUTTA Gaurab Sundar   GERMANY	Automated placement technologies	A Novel Way to Optimize Zero-Waste Prepreg Production Through the Integration of AFP and Online-PrePreg Technologies	Vol. 5	270
DYER William   NETHERLANDS	Matrix materials: polymers, metals, ceramics, concrete, geopolymer	Biobased epoxies for high-performance composite applications	Vol. 1	137

AUTHORS'S INDEX   COUNTRY	TOPIC	ARTICLE TITLE	VOLUME	PAGE
ECKRICH Maximilian   GERMANY	Topological optimization	Anisotropic topology optimization considering multiaxial fiber orientations for composite truss structures with improved intersection point design	Vol. 3	8
EDWARDS Huw   UNITED KINGDOM	Testing at Cryogenic Temperatures	Characterising Composite Microcracking Behaviour Under Load at Cryogenic Temperature	Vol.8	1027
EGUCHI Takeshi   JAPAN	Poster	Evaluation on Joining Strength of Rivet Fastening Using Slide Heat Servo Press of Pultruded CF/PEEK Round Rods with Varying Fiber Orientation	Vol. 5	489
EL HAWARY Omar   UNITED KINGDOM	Vitrimer matrix composites	Natural Fibre Reinforced Vitrimers For Sustainable Load-bearing Composites	Vol.8	867
ELENA Del Puerto Nevado   SPAIN	Vitrimer matrix composites	Aeronautical vitrimer resin for prepreg application	Vol.8	270
ELMAS Sinem   TURKIYE	Poster	Annealing Effects on Mechanical Performance and Failure Characteristics of CF/PEKK Aerospace Composites: A Thorough Exploration	Vol. 3	691
EMMERICH Rebecca   GERMANY	Reuse, Remanufacturing and Recycling	Use and production of non-crimp fabrics from RCF-slivers	Vol.8	324
ERDMANN Patrick   GERMANY	Bonding and bonding repairs	A numerical simulation method for impact damage and a mapping methodology for damage transfer in adhesively bonded joints	Vol.8	877

LE LOUËT Violaine   FRANCE	Experimental methods for process characterisation	Experimental bench for the determination of the thermal contact resistance between tapes in the AFP process	Vol. 5	556
LE REUN Adrien   FRANCE	Poster	Carbon fiber PAEK prepreg micrograph analysis using Weka deep learning methodology.	Vol.8	531
LE ROY Cindy   FRANCE	Data-driven approaches for composite characterization, monitoring, development	Integrable nanocomposite sensors for online process monitoring	Vol. 5	293
LEACH David   UNITED STATES OF AMERICA	Matrix materials: polymers, metals, ceramics, concrete, geopolymer	The Transition from Thermoset to Thermoplastic Composites	Vol. 2	352
LECOINTRE Lea   JAPAN	Poster	Lightning strike induced and impact induced delamination investigation using advanced Non-Destructive Testing methods	Vol. 3	1383
LEE Ian   UNITED KINGDOM	Understanding and improving longitudinal compressive strength	Cobotic manufacture of hierarchically architected composite materials	Vol.8	1061
LEE Jeeun   NEW-ZEALAND	AI-based methods	Physics-informed neural networks for the simulation of transverse Liquid Composite Moulding processes and constitutive modelling	Vol. 5	562
LEE Se-Min   SOUTH KOREA	Dynamic	Revolutionizing Airbag Deployment Predictions: Study of Dynamic Properties of TPO and PP in Automotive Safety Modeling	Vol. 3	263
LEVY Arthur   FRANCE	Experimental methods for process characterisation	Deconsolidation of Carbon/PEKK laminates. A parametric study.	Vol. 5	299
LI Carina Xiaochen   UNITED STATES OF AMERICA	Karl Schulte Session	Electrical and Thermal Properties of High Volume Fraction Aligned Carbon-Nanotube/Bismaleimide Nanocomposite Laminates	Vol. 2	360
LI Runze   UNITED KINGDOM	AI-based methods	A two-level machine learning model for failure prediction of an original Z-beam wing box concept	Vol. 3	270
LI Xi   NETHERLANDS	Fracture and damage	Interlaminar Fracture Behaviour of Emerging Laminated-Pultruded CFRP Plates for Wind Turbine Blades under Different Loading Modes	Vol. 3	372
LI Xiaole   SAUDI ARABIA	Novel test methods	Toward a more stable End-Notched-Flexure test	Vol. 4	280
LI Yansong   UNITED KINGDOM	Adaptive response and reconfiguration	Upcycling recycled carbon fibres as smart materials for manufacturing process monitoring and damage detection via electrical impedance tomography	Vol.6	83
LI Yiding   CHINA	Poster	Exploring the pressure-dependent nonlinear bending behavior of yarns in textiles: the physical basis for the virtual fiber modeling method in fabric compression processes	Vol. 5	71
LI Zhongyu   CHINA	Hybrid composites	Impact behavior of hybrid CFRP-elastomer-metal laminates in comparison with conventional fiber-metal laminates impacted with different energies	Vol. 3	1390

AUTHORS'S INDEX   COUNTRY	TOPIC	ARTICLE TITLE	VOLUME	PAGE
LIAPI Anastasia   FRANCE	Manufacturing defects in composite materials and structures	Investigating the sensitivity of Fiber Bragg Grating to process-induced gaps in thermoplastic composite laminates	Vol.8	538
LIEBAU Alex   GERMANY	Lightning Strike, fire behavior and fire retardance/resistance of composites	Investigation how the Flame-Retardant Content Affects the Mechanical Properties of GFRP for Lightweight Ship Constructions	Vol. 3	558
LIM Jun Woo   SOUTH KOREA	Poster	Development of high-performance bipolar plates by electrode integration for vanadium redox flow batteries	Vol. 1	45
LIMPRAPUWIWATTANA Manatsawee   AUSTRALIA	Self-healing	Tufting with Shape Memory Alloy Wires to Create Multifunctional Composites	Vol.6	321
LIN Lanhui   FRANCE	Poster	Translaminar fracture behavior of hybrid woven-ply PEEK thermoplastic laminates under isothermal and kerosene flame exposure	Vol. 3	378
LINDERBÄCK Paula   FINLAND	Poster	Common reed as novel Biosource composite production	Vol. 2	217
LIOTIER Pierre-Jacques   FRANCE	Liquid composite molding	Intra-yarn permeability assessment with a new dedicated set-up and characterisation of the associated capillary pressure	Vol. 5	570
LIPPENS Willem   BELGIUM	Process modeling and simulation	Development and validation of a thermo-mechanical finite element model for unidirectionally reinforced over-extruded profiles	Vol. 5	576
LIU Jinrong   JAPAN	-	Turning machinability of cast aluminum alloy matrix composites	Vol. 2	294
LIU Nan   UNITED KINGDOM	Material by design	An optimized negative-stiffness honeycomb compliant mechanism composed of dual-curved-beam units	Vol.8	1069
LIU Qingchuan   CHINA	Poster	The research of the residual stress influence on unidirectional composite materials mechanical properties through micromechanical analysis.	Vol. 3	566
LIU Shichen   NETHERLANDS	Hybrid composites	Hot-pressing of uncured metal-composite laminates: A numerical study on simultaneous deformation	Vol. 3	69
LOI GABRIELA   ITALY	Fatigue	Static and fatigue performance of stepped-lap composite joints reinforced by staple-shaped pins.	Vol.8	544
LOMOV Stephan   BELGIUM	Permeability of fibrous reinforcements for resin flow	Addressing challenges in reproducibility in radial permeability measurements conforming to the benchmark requirements	Vol.8	672
LOPEZ-ANIDO Roberto   UNITED STATES OF AMERICA	Durability, ageing, environmental effects	Longevity of additive manufacturing thermoplastic composite materials in infrastructure applications	Vol. 4	125
LORIMER Tobias   NEW-ZEALAND	Design of parts	Biaxial Testing of FRP Laminates Optimised Using a Range of Common Failure Criteria – Development of a Biaxial Testing Apparatus	Vol. 3	1399
LOUDAROU Evangelia   GREECE	Reuse, Remanufacturing and Recycling	Recovering rigid cellular foam material from End-Of-Life Wind Turbine Blades	Vol.8	1077
LOURDES Blanco Salgado   SPAIN	Automated placement technologies	Optimization of Automated Manufacturing Process using 3R Enduring Prepregs	Vol. 5	584
LU Maria Morissa   PHILIPPINES	Durability, ageing, environmental effects	The effects of ageing tests on the flexural performance of flax fibre composites	Vol. 3	863

AUTHORS'S INDEX   COUNTRY	TOPIC	ARTICLE TITLE	VOLUME	PAGE
LU Xin   JAPAN	Fatigue	A non-local cohesive zone model for fatigue modeling in composite laminates	Vol.8	80
LU Zhehong   UNITED KINGDOM	Graphene, graphene-based composites	Functionalized graphene oxide/ EPDM composites with enhanced barrier properties	Vol. 2	149
LUBINEAU Gilles   SAUDI ARABIA	Sensing and actuation	Enabling Smart Structural Health Monitoring in Composite Structures Via Printed Wireless Strain Sensors	Vol.6	55
LUCA MICHELE Martulli   ITALY	Delamination prediction and mitigation in laminated structures	An automated remeshing algorithm for the numerical analysis of propagating delaminations	Vol.8	85
LUCAS William   FRANCE	Acoustic Emission & ultrasonic method	Characterization of manufacturing induced agglomerated porosity in thermosetting composites using ultrasonic immersion setup and multiple scattering models	Vol. 4	134
LUCIJA Pustahija   AUSTRIA	Poster	Surface functionalized pyrolytic carbon composites for wastewater treatment	Vol. 2	613
LYU Weibang   CHINA	Lightning Strike, fire behavior and fire retardance/resistance of composites	Metallization of carbon nanotube films and their application in the lightning strike protection of CFRPs	Vol. 3	1407
MA Dayou   ITALY	Dynamic	A comprehensive investigation on the impact resistance of composites with nanoparticles	Vol. 3	353
MA Hong   DENMARK	Process modeling and simulation	Process-induced residual stresses in composite laminates by different constitutive laws and parametric investigation	Vol. 5	591
MACCAFERRI Emanuele   ITALY	Nanocomposites	Rubbery nanofibers via blend and emulsion electrospinning for structural modification of composite laminates	Vol. 2	412
MADI Salaheddine   BELGIUM	Fracture and damage	Digital volume correlation analysis of thermoplastic carbon fibre sheet moulding compound composites	Vol. 2	419
MADIA Evgenia   GERMANY	Karl Schulte Session	Investigating Structure-Property-Function relations of GFRP specimens embedded with CNT-doped filaments as strain gauges	Vol.6	327
MAGEIRA Pinelopi   DENMARK	Understanding and improving longitudinal compressive strength	Finite element predictions of in-situ 3D x-ray CT determined compression failure of uni-directional composites	Vol.8	385
MAHENDRAN Arunjunai Raj   AUSTRIA	Short & long fibre composites	Investigating the mechanical performance of bio-composites containing long natural fibers: A study on environmentally friendly chemical and physical treatments for natural fiber reinforcement	Vol. 3	1415
MAKIELA Patrick Adrian   GERMANY	Bonding and bonding repairs	Validation of static residual strength analyses of fiber composite bonded joints	Vol.8	1085
MALHEIRO Joana   PORTUGAL	Reuse, Remanufacturing and Recycling	Turning waste from the recycling process into more sustainable eco-boards for furniture and packaging	Vol.7	91
MALONE Beth   UNITED KINGDOM	Micro- and nano-scale test methods	Comparison study of fixed and variable blade interfacial testing systems for the characterisation of thermoset composites	Vol. 4	210

AUTHORS'S INDEX   COUNTRY	TOPIC	ARTICLE TITLE	VOLUME	PAGE
MANARIN Eleonora   ITALY	Reuse, Remanufacturing and Recycling	Chemical recycling of epoxy-anhydride fiber-reinforced composites	Vol.8	172
MANSINGH YADAV Mansingh   INDIA	Process modeling and simulation	Optimizing Dome Thickness to Enhance Gravimetric Efficiency in High-Pressure Composite Vessels.	Vol. 5	305
MANZI Emanuele   ITALY	Self-healing	Electrospun thermoplastic-thermosetting resin for hindering delamination and possibly self-healing in laminate CFRPs.	Vol.6	159
